

"A SOLID ALL-ROUNDER IN A SIMPLE DESIGN"

" [...] A lot of equipment for relatively little money, especially at the moment - because the MC 200 system is currently available at a special price. For the money invested, you also get proper workmanship and a carefully crafter interior."

" [...] Overall, the MC 200 is a pleasant companion for everyday life, with the excellent vocal reproduction standing out in particular. This small, chic system is especially suitable for pop music and ballads."

Conclusion:

"The Magnat MC 200 CD receiver, which is currently available at a special price of €499, covers everything a modern stereo system needs to be able to do. It supports, for example, Internet radio, Spotify playback, Tuneln and much more besides. But if you simply want to insert a CD and sit back and enjoy it, you're also in good hands with the Magnat MC 200 system. In general, the all-rounder makes a very good impression and is cleanly processed. The buttons on the supplied remote control exhibit a good pressure point and quickly transmit the relevant commands to the electronics. In order to be able to use the Internet services, the Magnat Audio Stream app must be downloaded. Various services such as Tuneln, iHeartRadio, Tidal and Napster can then be used. As usual, Spotify is controlled directly via the Spotify app. For the most part, we really liked the Magnat MC 200. Reproduction of vocals is particularly commendable. The small stereo system, however, does not cope optimally with very dominant instruments such as the electric guitar."
